

TT Racing

A growing segment is the TT racing productline. These top-of-the-line products excel in superior traction and precise adjustability. The shock absorbers are based on our 4616 design, damping triple adjustable, preload adjustable. For the front we use closed cartridges 3510 with compression adjustment one leg, reb adjustment one leg and preload adjustment both legs. For the BMW S1000RR we use Plug&Race electronic shock absorbers and cartridges.

Application list

Brand	Type	Model Yrs	Type	Artn	Description
Yamaha	R1	15-17	shock	46YA15-T8210	YAMAHA R1 2015-2016 COMP
